WORK EXPERIENCE

10/2024-
Present

Software Engineer

Perficient

📍 Cluj-Napoca, Romania

In my current role, I contribute to a large-scale project in the medical field, working in a collaborative multi-team environment. My key responsibilities involve developing and maintaining the client application using C# (.NET) and the server application using Delphi. I ensure quality and consistency across all project aspects, leveraging strong collaboration and communication skills to work effectively with my colleagues.

07/2023-
10/2024

Working Student - Software Engineer

Bosch Romania

📍 Cluj-Napoca, Romania

As part of an intern project, I collaborated on developing a dynamic and user-friendly web application. My responsibilities included utilizing the .NET framework to design and implement backend functionalities, ensuring smooth data management and system integrity with SQL Server integration.

Furthermore, I contributed to frontend development using Angular, enhancing the application's user interface and overall user experience.

08/2022-
09/2022

Web Development Intern

Wirtek

📍 Cluj-Napoca, Romania

Worked in a team of five members to develop a web application from scratch, using Agile practices (Scrum) and Azure DevOps.

The application was build using Blazor (C#) for the front-end, .Net Core (C#) for the back-end and SQL Server for the database.

EDUCATION

2024-
Present

Information Tehncology in Economics

Technical University of Cluj-Napoca

📍 Cluj-Napoca, Romania

Pursuing a master's degree.

2020-2024

Automation and Applied Informatics

Technical University of Cluj-Napoca

📍 Cluj-Napoca, Romania

I obtained the bachelor's degree in Systems Engineering.

03/2023-
04/2023

.NET Pre-Employment Training

Fortech

📍 Cluj-Napoca, Romania

This pre-employment training program was specifically focusing on .NET development.

The program covered several key areas, including Agile, Git, SQL, OOP, Angular, WebApi and Entity Framework Core.

— Programming Languages —

- C#
- C/C++
- JavaScript
- TypeScript
- HTML
- CSS
- Java
- Git
- Matlab
- Python
- Delphi

———— Technical Skills ————

- **Frontend:**
 - Angular
 - Blazor
- **Backend:**
 - .NET Core
 - Entity Framework
- **Database:**
 - Microsoft SQL Server
 - SQLite
 - MongoDB
- **Office:**
 - MS Office
 - L^AT_EX
- **Agile methodologies:**
 - Scrum
 - Kanban

 PROJECTS

2024

PMTRollout Dashboard

Technical University of Cluj-Napoca

This was my bachelor’s thesis project, which is a web application designed to help large organizations manage and monitor multiple projects using interactive Gantt charts. The app streamlines the implementation of the Scaled Agile Framework (SAFe) by centralizing data from Excel files into a SQL Server database and reducing manual work. Built with .NET Core for the API, Angular for the frontend, and a Python script for converting PowerPoint presentations into image previews.

2023

TempRadar

Technical University of Cluj-Napoca

TempRadar is a web application developed as part of a project for the Computer Networks subject. Utilizing ASP.NET 8 for the API, Angular for the frontend, and Microsoft SQL Server for the database. TempRadar offers real-time weather information by interacting with a public API. Additionally, the application allows users to integrate sensors that monitor and display indoor air quality. This comprehensive solution provides both current weather updates and insights into the air quality within the users’ homes.

2023

TripTrotters

Technical University of Cluj-Napoca

TripTrotters is a project developed for the Industrial Informatics subject. It features a user-friendly website designed to help users discover top destinations and find comfortable accommodations. Created using the ASP.NET MVC Web Application framework, the project was completed by a committed team of five, with me serving as the team leader.

2022

YelpCamp

Colt Steele’s Web Developer Bootcamp - Udemy

YelpCamp is an application for a fictional startup that allows users to create and review campgrounds and share it with other users. You must have an account in order to create campgrounds or review them. This project was created using Node.js, Express, Bootstrap and MongoDB. Passport.js was used to handle authentication.
